Bi Folding Doors

bringing the outside... inside

The Aztec bi-folding door meets the demands of contemporary living combined with beauty, function and form. Door panels are configured into a number of folds for greater versatility, which concertina into a reduced space, allowing optimum light and access into a room with minimal obstruction.

It allows for a wider opening from a house or conservatory extending any home so owners can enjoy the benefits of the outdoors and their gardens all year round. Ideal in applications where an opening or partition is required.

Aztec high performance PVCu bi-folding doors are technically innovative, which are highly desirable and is the "must have" product of today.

Features & Benefits

- System 10 or Rustique Profiles
- Smooth easy glide operation
- Door panels fold back fully to optimise the opening area
- Suitable alternative to Inline patio doors or French doors
- Ideal for conservatories or extensions leading into the garden
- Internally glazed for security
- Available in white and woodgrain profiles

Aztec bi-folding doors are made to fit each application. Precise fixing of the hardware is consistently achieved by the use of precision made jigs. All frames are checked for quality and accuracy before leaving the fabrication facility. Fabricated frames are fusion welded to ensure a strong weather resistant joint.

Cleaning & Maintenance

The roller tracks must be cleaned regularly and kept free of dust, grit, dirt and leaves so that smooth operation of the rollers is maintained.

All movable parts and locking points of hardware must be greased at least once a year or more depending on the location of the door.

Cleaning of the profile can be done via a mild liquid detergent as necessary. Proprietary brands of glass cleaner may also be used*.

*Do not use glass cleaner on the outside surface of self-cleaning glass as this may damage the coating.
